

# Irina, Australia

I don't know whether you remember me or not. Sometime around July this year I wrote you a letter about my husband (we live in Australia and my husband is an Australian) and you sent us your book in English. It is almost 5 months since that time and I want to write you what has happened since then.

My husband has not started reading the book right away always finding various excuses like absence of time or energy, etc As a result the book was either put aside "till the following Monday" or he has simply forgotten about it. But during this time I have been reading your books which helped me to analyze my actions, work on self-development and things I idealized, including my dreams... I even have written you letters and each time have been receiving an answer. I thank you very much for this!

As the Sensible Way technique has become an integral part of my life and I have become noticeably happier, my dreams have started to come true. My husband became interested in my methods of working on myself and finally started to read the book. He has tried to apply the event formation technique and it has worked out!

He wanted to get a job with an annual income of not less than \$120,000 US (his specialty is Construction Project Manager). He developed a formula for himself, visualized it, and used the reminders. In a little while he kind of accidentally (but we already know that nothing is accidental) has ran into the director of a large bank who liked my husband and introduced him to his friend who was the owner of a large construction company in Australia. In two or three weeks my husband received a contract with an annual income of at least \$120,000US! It might seem to be a chain of accidents as if all of that have happened all of a sudden. But my husband knew for

sure that it was Event Formation Technique that proved to be working.

We live in one big house together with my husband's parents and his brother. Each of them have become really interested in your system. Ricardo (my husband) and I have been talking a lot about your ideas, your book, your center and about you. And we did not just talk about it we proved our stories with our real achievements.

For example, I visualized a job for myself in the tourism industry and have got the job, despite my Russian accent and the fact that many people didn't believe in my potential. And this is just one example!

I have promised you do not share your book with anybody and I have been keeping the promise. To tell the truth though, my husband and I let my father-in-law read the book. He was not just reading it, he has been absorbed by it and he has started writing a diary and has been working on eliminating the idealizations and at the same time on forming his own events.

He has finally realized why his fondest wish didn't come true (he is a football coach and has always wanted to have a big team and to become famous, but within the last several years all his attempts to get a good job have failed).

Now during evening talks we speak a lot about your techniques and we discuss obstacles to achieve the goals and share our progress. However, our talks haven't remained within our family circle. It's spreading in a chain reaction fashion from one person to another and your book is becoming very popular due to such rumors. The interest to your book is so great now that talking about you has become so frequent and vital that it is becoming difficult not to share the book with others.

You can't imagine how many people in Australia your book could have helped, and you could become a very popular writer here! Thank you for the work you do, and for your books. I have

every single one of your books in Russian and almost all of your meditations and I have been constantly receiving your newsletters. And now I am waiting for a new book on health!

Special thanks to you from my husband. We have made a wish to meet you sometime in person (maybe during our next trip to Russia), if you don't mind. And I also want to participate in your workshops.

*Looking forward for your reply.*

*Thank you in advance,*

*Irina,*
