Dear Alexander,

I have never read your books, only your newsletters. The sense of your technique has become clear to me and I have started to use it trying to understand everything that was happening to me.

Since then some amazing and even mind-blowing changes have happened in my not so long life. I went to South Korea to study. It felt like going to another planet. I have taken writing. I have met a lot of most interesting people. I have been on TV. I have been doing scientific research. I have traveled and studied foreign languages and Oriental culture. I have taught English and practiced taekwondo. I couldn't have even imagined that life could be SO interesting! It is a good fortune to spend life like this travelling around this wonderful and lonely planet!

For nearly a year now I haven't felt any strong and long lasting negative emotions. There is a strong confidence that nothing bad could happen to me. And it did not.

Things have gone far for me. Life is becoming more and more interesting each day. This is a game that never ends but brings me up to newer levels. Thank you for my understanding that I am a person with a great destiny. It is so great that I seemed to be able to influence other people's destinies (I was always afraid of that and yet it happened).

I can attract money and good luck into my own life and into the lives of others – and I have proved this several times!
